Automation Report: Amazon Mobile App vs Website Testing

Objective:

To compare the performance and accessibility between the **Amazon Android Mobile App** (native) and the **Amazon Web Platform**, by automating product search, sorting, and cart actions using **Appium** and **Selenium** respectively.

Test Cases Performed

Test Case ID	Task	Platform	Description
TC-001	Search for "Wireless Headphones"	Mobile, Website	Validate search functionality
TC-002	Sort by Lowest Price	Mobile, Website	Identify and extract the lowest priced item
TC-003	Sort by Highest Customer Rating	Mobile, Website	Identify and extract the highest rated item
TC-004	Add item to Cart	Mobile, Website	Add selected item to the cart
TC-005	Performance Monitoring	Mobile, Website	Capture execution time of each task

---

Mobile App (Appium-based) – Observations

Task	Time Taken (s)	Notes
Search	6.57	Operated via Dom-based extraction
Sort by Lowest Price	2.92	screenshot captured
Sort by Highest Rating	3.76	screenshot captured
Add to Cart	1.37	Button located via positional tapping

Screenshot Reference:

```
PS C:\Users\siddharth singh\Downloads\BITS_F364_Assignment3_Code> python app.py
[a] Search completed in 6.57 seconds
[b] lowest priced headphone completed in 2.92 seconds
[c] highest rated headphone completed in 3.76 seconds
[d] add to cart completed in 1.37 seconds
```

Group 7

Website (Selenium-based) – Observations

Task	Time Taken (s)	Notes
Home Page Load	3.14	WebDriver connected to browser successfully
Search	4.83	Performed through DOM interaction
Sort by Price	0.74	DOM parsing allowed extracting price ₹330 and item name
Sort by Rating	0.17	Extracted product ₹12,358 with accurate name and metadata
Add to Cart	0.51	Successfully interacted with cart button via element ID

Screenshot Reference:

```
PS C:\Users\siddharth singh\Downloads\BITS_F364_Assignment3_Code> python web.py

DevTools listening on ws://127.0.0.1:50366/devtools/browser/e392298e-5830-45a5-8bc4-365dcb2f27c7
[f] Home page load time: 3.14 seconds
[a] Search time: 4.83 seconds
[b] Sort by price time: 0.74 seconds
Name: TECHNO LINE Ultrapods True Wireless Headphones With Digital Display, Black
Price: ₹330
[c] Sort by rating time: 0.17 seconds
Name: Bluetooth Headphones Over Ear, 80H Playtime Wireless Headphone with 3 EQ Modes, Built-in Mic, Deep Bass, HiFi Stereo Foldable Wireless Headset for
e PC Travel Workout Office (Pink)
Price: ₹12,358
[d] adding to cart time: 0.51 seconds
```

Conclusions

- **For performance testing, price comparison, or detailed product analysis**:
  Use the Website via Selenium.
  It offers faster load times, structured data access, and more reliable automation capabilities.
- Website automation allows **full data retrieval** using DOM, making it more suitable for detailed product analysis tasks.
- **Execution times** are faster on the web platform due to direct DOM access and optimized resource loading.
- Mobile automation is viable for end-to-end user simulation but limited in precision for data

extraction.
